

HARMON YARD LOCOMOTIVE FUELING FACILITY

Service: General Contracting

Value: \$4.8 Million | Present Day Value: \$7 Million | Completion Date: April, 1997

PROJECT DETAILS

The work for this project included deep excavation for utilities, contaminated water and soil treatment, dewatering, installation of a concrete fueling island and fuel dispensing system, a new pump house, and storage for fuel. This work was performed within an active maintenance yard and demonstrates Halmar's capabilities to complete rail projects on time and in budget.

ACCOMPLISHMENTS

Project completed ahead of schedule and below the owner's budget.

Work carried out within an active maintenance yard.
